Visualization in R

Data Visualization in R with
ggplot2

Advanced Data Visualization
with R

Publishing Visualizations in R
with Shiny and
flexdashboard

Data Visualization Capstone

Apr 16, 2021

Julia Breitenbruch

has successfully completed the online, non-credit Specialization

Data Visualization & Dashboarding with R

In this Specialization, learners developed and honed their skills using R to produce data visualizations. Learners created a range of figures, from simple figures like histograms and scatter plots to more complex figures like alluvial diagrams and heat maps. Learners incorporated these visualization into reproducible reports and data dashboards. Learners completed a Capstone at the end of the Specialization to apply their knowledge and skills in an individual data visualization project.

Collin E. Paschall,
PhD/JD

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
